Krish Pokle

Plano, Texas | (469) 465-0662 | krishpokle@gmail.com

EDUCATION

Texas A&M University — **College Station, Texas**
B.S. Electrical Engineering - Minor in Mathematics
May, 2028
College of Engineering - *Craig and Brown Honors* — *Cumulative GPA:* **3.5**

PROJECTS

Clampus (clampus.com)
Founder — May 2026 – Present

- Built and deployed Clampus, a full-stack club and opportunity discovery platform for Texas A&M's 1,300+ student organizations, using Next.js, Supabase, and TypeScript, deployed on Vercel
- Integrated the Anthropic (Claude) API to ship AI features including a personalized club matcher, resume-boosting recommendations, essay assistance, and automated research-outreach email drafting
- Implemented subscription billing with Stripe, including checkout sessions, webhook-driven entitlement syncing, and tiered feature gating for both individual and organization-level plans

Solar-powered RC Car

- Designed and assembled a solar-powered RC car integrating a photovoltaic charging circuit, LiPo battery management via TP4056, and dual DC motor control using an L9110S H-bridge driver
- Designed a custom 2-layer PCB in KiCad including schematic capture, component footprint assignment, net routing, and Gerber file generation for JLCPCB fabrication
- Modeled a Porsche-style RC car chassis in Autodesk Fusion 360 and prepared optimized STL files for FDM 3D printing on a Creality Ender 3 Pro using PLA filament

LEADERSHIP & INVOLVEMENT

PREP (Progressively Reaching Excellence in Professionalism) — College Station, TX
Service Committee — September 2025 – May 2026

- Coordinated with 10+ local organizations to plan and execute community service opportunities for members
- Led a team of 50 members in organizing and completing service projects, managing logistics and volunteer scheduling

IEEE — College Station, TX
Member — August 2025 – Present

- Participated in hands-on workshops on circuit design and embedded systems, attended a semiconductor industry summit and collaborated with peers on technical design challenges

PROFESSIONAL EXPERIENCE

USTA — Frisco, TX
Official, contractor — September 2022 – Present

- Supervised all aspects of play, ensuring all USTA regulations and ITA guidelines are met
- Coordinated with other officials, site directors, and managers to manage a tournament with 200 players
- Refereed over 35 tournaments and worked on average 20 hours per tournament

SKILLS, ACTIVITIES & INTERESTS

Languages: Python, C++, Java, TypeScript
Hardware: KiCad, Fusion 360, soldering, 3D printing
Software & Tools: Next.js, Supabase, Stripe, Vercel, Git

Relevant Coursework: Circuits, Signals & Systems, Electronics, Digital System Design, Microcontrollers
